

# Rivers Vocabulary Matching Game

Match the word to its definition by writing the correct word in the box.

	solid matter which settles to the bottom of a liquid, for example the sandy riverbed		a barrier built to hold back water and form a reservoir
	clay, fine sand or other material carried along in water and deposited as sediment		the place where a river opens out into the sea or into another river or lake
	a smaller river or stream flowing in to join or feed a larger river		the land beside or sloping down to a river
	the gradual destruction of something, usually the earth by water		a rounded bowl in a landscape where water such as a lake may be pooled
	a large, usually artificial lake used to supply water		following a winding path or course that is specifically not straight or direct
	the area of land around a river where the ground lies very low and is easily flooded		the beginning or starting point of a river or stream

bank	basin	dam	floodplain	erosion	tributary
meander	mouth	reservoir	sediment	silt	source

For a fantastic work of fiction based on rivers, download the Twinkl Originals short story 'Sabryna and the River Spirit' [here](#). Follow Sabryna as she travels downstream, learning all about how her community can live alongside the river without damaging the environment.

# Rivers Vocabulary Matching Game - Answers

<b>sediment</b>	solid matter which settles to the bottom of a liquid, for example the sandy riverbed	<b>dam</b>	a barrier built to hold back water and form a reservoir
<b>silt</b>	clay, fine sand or other material carried along in water and deposited as sediment	<b>mouth</b>	the place where a river opens out into the sea or into another river or lake
<b>tributary</b>	a smaller river or stream flowing in to join or feed a larger river	<b>bank</b>	the land beside or sloping down to a river
<b>erosion</b>	the gradual destruction of something, usually the earth by water	<b>basin</b>	a rounded bowl in a landscape where water such as a lake may be pooled
<b>reservoir</b>	a large, usually artificial lake used to supply water	<b>meander</b>	following a winding path or course that is specifically not straight or direct
<b>floodplain</b>	the area of land around a river where the ground lies very low and is easily flooded	<b>source</b>	the beginning or starting point of a river or stream
